Dear Mr. Crawford,

We have a son, George, age 11, who is fatally allergic to peanuts and tree nuts. We rely on food ingredient labels to be sure that foods are safe for him. We want you to understand how critical it is to us that the FDA enforce all recalls that relate to food safety due to undeclared allergens.

We are depending on you to keep the standards on food allergens at the highest level. George's life depends on your effectiveness.

With Best Regards,
